AKASH SURESH KULKARNI

+91 8073471289 | akashraghvendra2654@gmail.com | LinkedIn: AkashSK | GitHub: AkashSK

PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong foundation in programming, databases, software development, and problem-solving. Proven hands-on experience through internships and real-world projects, with strong analytical and teamwork skills and a willingness to continuously learn, adapt, and deliver impactful results.

EDUCATION

B.E. (Computer Science) | 2023 - 2027
Bangalore Institute of Technology
CGPA: 9.26

Pre-University (Science) | 2021 - 2023
Tungal Science PU College, Jamkhandi, Bagalkot
Percentage: 95%

EXPERIENCE

Data Analyst Intern (Python, SQL, Power BI) — Elevate Labs *May 2026 – Jul 2026*

- Performing data cleaning, preprocessing, and exploratory analysis on real-world datasets using Python and Pandas across 9,936 movie records.
- Scraped and analyzed LinkedIn job listings across 3 cities and 3 job roles to identify hiring trends and in-demand skills.
- Wrote SQL queries for data extraction and validation, automated data-processing tasks, and created Power BI dashboards to visualize trends and key business metrics.
- Built a movie prediction model (R^2: 0.52, 0.61) and a cosine similarity-based recommendation system.

RELEVANT PROJECTS

1. Supply Chain & Inventory Optimization GitHub ↗ Dashboard ↗

- Analyzed ~30,000 product-store combinations to identify demand patterns, inventory trends, product-level sales performance.
- Built a Python pipeline integrating 3+ data sources to identify seasonality, demand fluctuations and fast/slow-moving products.
- Engineered lag & rolling features, performed SQL revenue analysis, and built Power BI dashboards for inventory and sales KPIs.
- **Tech Stack:** Python (Pandas, NumPy), SQL, Power BI

2. PneuScan AI: Multimodal Pneumonia Detection & Clinical Analysis Ecosystem GitHub ↗ Live Demo ↗

- Engineered a multi-modal diagnostic engine fusing chest radiograph spatial matrices with clinical vector features, achieving 95% accuracy and F1-Score of 0.94.
- Optimized inference to 1.2s via warm-load protocol; integrated Grad-CAM heatmaps for explainable thoracic pathology localization.
- Built a dual-panel clinical workstation using React, Express.js, and MongoDB, with role-based access, automated report generation, and real-time patient data tracking.
- **Tech Stack:** Python, Keras, TensorFlow, Express.js, React, Scikit-learn, NumPy

3. SmartShelf - AI-Powered Expiry Detection & Notification System GitHub ↗

- Developed an AI-driven inventory platform supporting 10+ product categories with automated expiry tracking, freshness monitoring, and smart reminders.
- Engineered a full-stack system with 4+ core modules including inventory management, analytics, activity tracking, and automated email/browser push alerts using scheduled background jobs.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Nodemailer, Web Push, Node-Cron

TECHNICAL SKILLS

Programming
Python, SQL, C++

Visualization
Power BI, Tableau

Databases
MySQL, MongoDB, Oracle SQL

Data Analysis, ML
Excel, Pandas, NumPy, Scikit-learn, Tensorflow , DL

Web Tools
HTML, CSS, Express.js, Rest APIs, AWS

Core CS
OOPS, OS, CN, DBMS, System design, Git, GitHub

CERTIFICATIONS

- HackerRank SQL (5★ Gold) | 150+ Problems Solved - LeetCode & HackerRank
- Certified Data Analytics Masters - Udemy
- Oracle Cloud Infrastructure (OCI) AI Foundations Associate - Oracle University
- Certified Participant, State-Level Hackathon - GDSC (Google) & Unstop
